**Tankoa Yachts: Solo**  
Apart from being one of the most efficient yachts in recent history, Tankoa 72-m/236' Solo is high tech, eco-friendly and an incredibly well-equipped superyacht.

## Tankoa Yachts: *M/Y Solo*

The SOLO had me at sauna wood sourced from a medieval castle in Finland. This level of fetishistic detail tells you everything you need to know about the latest Tankoa yacht to wow the market. Onward with the showboating, stairwell flooring is white onyx cristallino while walls are made of reclaimed oak sourced from a 300-year-old farm in Norway. SOLO was widely considered best in show, awarded most ecological yacht of the year. Forward of the winter garden, the main deck houses a cinema lounge, while the dining room grandly accommodates a table for 16.

## Dynamiq: *GTT 135*

The Dynamiq GTT 135 is a sporting, all-aluminum, fast cruiser. Built on a 134 ft platform with a round bilge hull, she is the ideal family superyacht for cruising the Amalfi Coast or the Caribbean. Her transatlantic range of 3,000 nautical miles means the yacht can voyage between the West Indies and the Med on her own to make the most of the two main cruising seasons every year. With the largest sundeck in her class at 1,291 sq ft and five spacious staterooms, she is the epitome of versatile luxury. ✈
