

## TANKOA PROJECT BOLIDE YACHT

SHARE TWEET

The Tankoa Project Bolide Yacht began as an idea by Italy's Exclusiva Design Studio Director Fabio Mazzeo who wanted to create a 'superyacht' far beyond traditional concepts. They teamed up with specialty shipyard Tankoa to assure the unrelenting quality and seaworthiness of the Project.

The result, to be presented at the MYS Monaco Yacht Show, is a 233-foot symphony of racecar-inspired lines and over 5,400 square feet of floor to ceiling glass that gives unparalleled and uninterrupted views of the ocean from anywhere onboard. The distinction between interior and exterior is intentionally blurred throughout this luxurious and roomy craft featuring 6,500 square feet of usable floor space.

Along with five lower-deck VIP suites, the private owner's deck also includes a full bedroom, gym, spa, dressing room, multiple terraces, and a Jacuzzi. Three pools are positioned around the yacht with the aft deck pool having a raisable deck that can turn it into a dance floor or party platform.
