Tankoa Yachts has revealed plans for its 58m Open, a 190-foot yacht designed by Francesco Paszkowski and intended to be built in aluminum.

The initial details show a beam of 31 feet 6 inches, and a draft just shy of 6 feet. Power will be triple 2,000 kW MTUs paired to Kamewa water jets and a central booster.

The projected maximum speed is 28 to 30 knots.

**Tankoa says the design combines style and speed:** “From now on, luxury cruising doesn’t mean giving up the excitement of running fast and loose.”
